KEY PRODUCTION SYSTEMS & CASE STUDIES

Madrasa Management System • Flagship Institutional Platform

Next.js 15, React 19, TypeScript, PostgreSQL, Prisma, Tailwind CSS, Docker

- Eliminated 90% of manual paper registers by automating student admissions, exam grading, and fee collections.
- Reduced report card generation time from several days to under 2 seconds with instantaneous PDF generation pipelines.
- Configured 24/7 continuous uptime deployment via Cloudflare zero-trust tunnels and self-hosted Docker.

Joruri Rokto (Emergency Blood Matching Platform)

React, Node.js, Express, Tailwind CSS, Geolocation PWA

- Engineered a zero-friction emergency portal with 0-second registration barriers, enabling 1-tap direct dial to donors.
- Integrated a medical donor compatibility cross-matching algorithm and 4-tier ambulance dispatch registry.
- Saves an average of 15+ critical minutes during life-saving patient emergencies.

Smart Agro & Voice Accountant (Voice-Powered Farm Accounting)

React, Web Speech API, Bangla NLP Parser, SMS Gateway API, Web Audio API

- Developed a hands-free Bangla voice dictation system enabling farm and pond workers with wet hands to log feed and expenses.
- Automated daily SMS transaction summaries dispatched directly to business owners, reducing omitted cost logs to 0%.
